### ABOUT VARANASI

Varanasi has been the capital city of oriental learning since time immemorial and has produced great poets, writers, musicians and scholars. The holy city of Varanasi, known as the city of temples, is situated on the banks of river Ganges and is said to be presided over by Lord Shiva. For the continuance and dissemination of ancient Indian knowledge and also to keep pace with the advanced modern knowledge, the Banaras Hindu University was established on southern part of this city in 1916 by the great visionary Late Pt. Madan Mohan Malviyaji. Banaras Hindu University in its two sprawling campuses (BHU main campus & Rajiv Gandhi South Campus at Barkachha) has 6 institutes, 16 faculties, 140 departments and 4 interdisciplinary schools covering almost all frontier areas of Science, Technology, Medicine Agriculture, Arts, Social Science, Commerce, Education, Law, Performing Arts, Visual Arts, Management and Sanskrit Vidya.

### DEPARTMENT OF CHEMISTRY

Department of Chemistry is one of those few departments, which were established soon after the inception of the Banaras Hindu University. The thrust areas in which work is being pursued in the department are: Synthetic Organic Chemistry, Coordination Chemistry, Materials Chemistry, Polymeric Materials, Sensor Technology and Molecular imprinted materials, Applied Electrochemistry, Theoretical Chemistry, Supra-molecular Chemistry, Molecular Electronics, Department is being funded by DST-FIST, DST-PURSE and UGC-UPE programmes. Faculty members of the department are pursuing projects (above 5 Crore) from various agencies like UGC, DST, CSIR, DBT, DRDO, BRNS etc.

## THE THEME OF THE SYMPOSIUM

Chemistry is at the helm of all human activities. The symposium will focus on the work of the leading chemists in India through plenary and invited lectures in the frontier areas of Chemical Sciences to review current research developments and highlight future challenges. It will bridge the traditional core areas of Chemistry and interface these with materials, technology, biology, energy devices and information storage areas. The present symposium is aimed to promote discussion and exchange of experiences and information related to modern science involved in various disciplines particularly focusing the development of advanced materials for future applications to mankind. The thrust of the present symposium will be: Emerging Trends in Chemical Sciences. This symposium will be useful for academicians, researchers and students in the universities as well as R & D scientists of any modern industries.

## INVITATION

The organizing committee cordially invites your participation in this symposium. We look forward for the exchange of ideas and information during this period. Besides Plenary and Invited Lectures covering frontline topics on "Emerging Trends in Chemical Sciences" by distinguished chemists, there will be contribution of papers too.

## ABSTRACT & POSTER PRESENTATION

Abstracts not exceeding 200 words in the area of Organic synthesis and Materials Science are invited for consideration of contributory oral or poster presentations. Submissions are to be made only through e-mail attachment (convener/ co-convener) on or before October 31, 2018 along with a copy of completed registration form. The font to be in Times New Roman (12 pt font) with single line spacing and margins of 2.5 cm. File format should be Microsoft Word (Office XP, 2007). Depending on the availability of time, selected papers only will be chosen for oral / poster presentations.

## ACCOMMODATION

Due to paucity of funds & accommodation on campus it will not be possible to provide T.A. and accommodation to all participants. They may have to arrange their travel / accommodation on their own.
