### **List of Publications**

1. Singh, H.P., Gangele, R.K. and Singh, R. (1993): Some shrinkage estimators for the scale parameter of the exponential distribution. Vikram Mathematical Journal 13,57-64 .
2. Singh, R. and Singh,H.P (1995): A Hartley-Ross type estimator for finite population mean when the variables are negatively correlated. Metron,43,205-216.
3. Tracy, D.S.,Singh,H.P. and Singh, R. (1996): An alternative to ratio-cum-product estimator in sample surveys. J.S.P.I.,53,375-387.
4. Singh,H.P. and Singh, R. (1997): A class of shrinkage estimators for the variance of a normal population. Microelectronics & Reliability, 37,863-867.
5. Singh,H.P.,Singh, R. and L.N. Sahoo (1997): Estimation of population mean using auxiliary information in stratified systematic sampling. Sankhyikee,3&4,13-21.
6. Singh, R., Singh, H.P and Espejo, M.R. (1998): The efficiency of an alternative to ratio estimator under a super population model. J.S.P.I.,71,287-301.
7. Tracy, D.S., Singh,H.P. and Singh, R. (1998): A class of almost unbiased estimators for finite population mean using two auxiliary variables. Biom. Jour.,40,753-766.
8. Singh, R. and Singh,H.P (1998): Almost unbiased ratio and product-type estimators in systematic sampling. QUESTIO,22,3,33-42.
9. Singh, R., Singh,H.P and Biradar,R.S. (1998): A family of almost unbiased ratio estimators in double sampling. Parisankhyan Samikkha,5,33-42.

ISSN : 1022-1212

10. Tracy, D.S.,Singh,H.P. and Singh, R. (1998): A class of unbiased estimators alternative to ratio-cum-product estimators in sample surveys. *Parisankhyan Samikkha*,5,43-50. ISSN : 1022-1212 Dhaka, Bangladesh : Statistical Research Unit, Dept. of Statistics, University of Dhaka
11. Tracy, D.S.,Singh,H.P. and Singh, R. (1999): Constructing an unbiased estimator of population mean in finite populations using auxiliary information. *Statistical Papers*, 40,363-368.
12. Singh,H.P. and Singh, R. (2001): Improved Ratio-type Estimator for Variance Using Auxiliary Information. *J.I.S.A.S.*,54(3),276-287.
13. Espejo,M.R.,Singh,H.P., Singh, R. and Nadarajah (2001): Optimal homogeneous linear estimation for a super population model. *Rev. Academia de Ciencias*,56,93-98.
14. Espejo, M.R., Singh,H.P. and Singh, R.(2001): Optimal unbiased linear integration of estimators. *Statistics & Decisions*, 19,373-394.
15. Singh,H.P. and Singh, R. (2002): A class of chain ratio-type estimators for the coefficient of variation of finite population in two phase sampling. *Aligarh Journal of Statistics*,Vol.22,1-9.
16. Singh,H.P. and Singh, R. (2003): Estimation of variance through regression approach in two phase sampling. *Aligarh Journal of Statistics*, 23, 13-30.
17. Singh,H.P. and Singh, R. (2003): A family of unbiased estimators for finite population mean when the variables are negatively correlated. *Advances in mathematical statistical and computational methods in science and technology*, 195-200.
18. Khoshnevisan, M., Kaymarm,F., Singh,H.P., Singh, R. and Smarandache, F. (2003): Econometric analysis on efficiency of estimators. *Libertas Mathematica*, Vol. 23, pp. 183-194.
19. Khoshnevisan,M., Kaymarm,F., Singh,H.P., Singh, R. and Smarandache, F. (2004): Empirical study in finite correlation coefficient in two phase estimation. *International journal of social economics*, 31(10), 890-902.
20. Singh,H.P., Singh, R., Espejo, M. R., Pineda, M .D. and Nadrajah, S.(2005): On the efficiency of a dual to ratio-cum-product estimator in sample surveys. *Mathematical proceedings of the Royal Irish Academy*, 105 A(2), 51-56.
21. Singh, R. and Singh, J (2006): Separation of bias in the estimators of population mean using auxiliary information. *J. Rajasthan Acad. Phy. Sci.*, 5(3),327-332.
22. Singh, R., Chauhan, P. and Sawan, N.(2007): A family of estimators for estimating population means using known correlation coefficient in two-phase sampling. *Statistics in Transition*, 8(1),89-96.

23. Khoshnevisan, M., Singh, R., Chauhan, P., Sawan, N. and Smarandache, F. (2007): A general family of estimators for estimating population means using known value of some population parameter(s). *Far east journal of statistics*, 22(2), 181-191.
24. Singh, R., Chauhan, P. and Sawan, N.(2007): Use of known correlation coefficient in construction of ratio-product estimator for estimating the finite population mean. *Jour. Of Prob. Stat. Sci.*,5(2),203-208.
25. Singh, R., Chauhan, P. and Sawan, N.(2007): Estimation of finite population mean utilizing known coefficient of kurtosis. *Jour. Emp. Res. In Soc. Sci.* 2, 1-2, 1-9.
26. Singh, R., Chauhan, P., Sawan, N. and Smarandache,F.(2008): Almost Unbiased Ratio and Product Type Estimator of Finite Population Variance Using the Knowledge of Kurtosis of an Auxiliary Variable in Sample Surveys. *Octagon Mathematical Journal*, Vol. 16, No. 1, 123-130.
27. Singh, R., Chauhan, P., Sawan, N. and Smarandache,F.(2008): A General Family of Estimators for Estimating Population Variance Using Known Value of some Population Parameter(s). *Octagon Mathematical Journal*, Vol. 16, No. 1, 160-165.
28. Singh, R., Chauhan, P. and Sawan, N.(2008): On linear combination of Ratio-product type exponential estimator for estimating finite population mean. *Statistics in Transition*,9(1),105-115.
29. Singh, R., Chauhan, P., Sawan, N. and Smarandache,F. (2008): Ratio estimators in simple random sampling using information on auxiliary attribute. *Pak. J. Stat. Oper. Res.*,4,1,47-53.
30. Singh, R., Kumar, M. and Smarandache, F. (2008): Almost unbiased estimator for estimating population mean using known value of some population parameter(s). *Pak. J. Stat. Oper. Res.*, 4(2) pp63-76.
31. Singh, R., Singh, J. and Smarandache,F.(2009) : Optimum Statistical Test Procedure. *Italian Jour. Of Pure and Applied Mat.*,26,219-228.
32. Singh, R., Chauhan, P., Sawan, N. and Smarandache,F.(2009): Improvement in estimating the population mean using exponential estimator in simple random sampling. *Intern. Jour. Of Stat. and Econ. (BSE)*,3,13-18.
33. Chaudhary, M.K. , Singh, R., Shukla, R. K., Kumar, M. and Smarandache, F. (2009): A Family of Estimators for Estimating Population Mean in Stratified Sampling under Non – Response. *Pak. J. Stat. Oper. Res.* 5(1), pp47-54.
34. Singh, R., Kumar, M., Chaudhary, M.K., Kadilar, C. (2009) : Improved Exponential Estimator in Stratified Random Sampling. *Pak. J. Stat. Oper. Res.* 5(2), pp 67-82.

23. Verma, H. K., **Singh, R.** and Florentin, S. (2014) : A family of median based estimators in simple random sampling. **The efficient use of supplementary information in finite population sampling. Education Publishing, USA.**  
ISBN:978-1-59973-275-6.
24. Singh, V. K., **Singh, R.** and Florentin, S. (2014) :Difference-type estimators for estimation of mean in the presence of measurement error. **The efficient use of supplementary information in finite population sampling. Education Publishing, USA.**ISBN : 978-1-59973-275-6.
25. **Singh, R.,** Malik, S., Adewara, A. A. and Florentin, S. (2014) : Multivariate ratio estimation with known population proportion of two auxiliary characters for finite population. Collected papers Vol. V, Europa Nova, Brussels, 2014 (ed. F. Smarandache), 231-238. ISBN 978-1-59973-317-3.
26. **Singh, R.,** Malik, S.,and Florentin, S. (2016):An improved suggestion in stratified random sampling using two auxiliary variables. Uses of sampling techniques & inventory control with capacity constraints ( Ed. Sachin Malik, Neeraj Kumar and Florentin Smarandache), Pons Editions, Brussels, 9-18.
27. **Singh, R.,** Malik, S.,and Florentin, S. (2016) :Some ratio and product estimators using known value of population parameters. Uses of sampling techniques & inventory control with capacity constraints ( Ed. Sachin Malik, Neeraj Kumar and Florentin Smarandache), Pons Editions, Brussels, 19-29.
28. **Singh, R.,** Malik, S.,and Florentin, S. (2016) :An unbiased estimator for estimating population mean in simple random sampling auxiliary attribute. . Uses of sampling techniques & inventory control with capacity constraints ( Ed. Sachin Malik, Neeraj Kumar and Florentin Smarandache), Pons Editions, Brussels, 30-52.
29. Bouza, C.N.H., Sira, M.A.A. and Singh, R. (2017) : Approximation and estimation of the approximation error in stochastic programming programs. Nova Science Publishing, 45-89.
30. Singh, R., Mishra, P.and Bouza, C.N. (2018) : Estimation of population meanusing information on auxiliary attribute: A review. Ranked Set Sampling. (Eds- C.N. Bouza and Al Omari), Academic Press. **ISBN :9780128156933**

31. Singh, R. and Khare, S. (2019) : Log-exponential ratio-type estimator for estimating finite population mean under SRSWOR and double sampling scheme. Dimensions of Nanotechnology and Bio-Statistics. Eds:- D.K. Gupta, Shruti, P.P. Dubey. LAMBERT Academic Publishing.
32. Singh, R. and Mishra, R. (2021) : Neutrosophic transformed ratio estimators for estimating finite population mean in sample surveys. Pg 39-47. Recent Advancements in Sampling Theory & its Applications. Eds: D.K. Yadav, R. Yadav, S.K.Singh,A.K.Shukla.MKSES Publisher.
33. Singh, R. and Mishra, R. (2023) :Generalized power transformed robust ratio type estimator : An application to COVID-19. Research highlights in Mathematics and Computer science Vol. 4. BP International.
34. Singh, R. Smarandache, F. and Mishra, R. (2023) :Generalized robust-type neutrosophic ratio estimators of pharmaceutical daily stock prices. Cognitive intelligence with Neutrosophic Statistics in Bioinformatics.

#### **Papers in Conferences/Symposia Proceedings**

1. Tracy, D.S., Singh, H.P. and **Singh, R.** (1997): Almost separation of bias precipitates in the estimators of population mean using auxiliary information. 9th International Conference on Informatics and Cybernetics held on August 18-23, 1997 at the Markgraf-Ludwig-Gymnasium in Baden-Baden, Germany.
2. Espejo, M.R., Singh, H.P. and **Singh, R.** (1998): Unbiased estimation of production total using specific sampling designs. Agricultural Statistics 2000. Contributed Papers, 31-32, 1998. United States Department of Agriculture Washington DC, book.
3. Vishwakarma, P.K. and **Singh, R.** (2003): E-governance : Virtuality or Reality An Indian Flavour. Management Dynamics in Integrating World Market. Eds. Agrawal, I.C., Agrawal, P.R. and Geetika. SMS. MNIT – 2.30-2.32.
4. **Singh, R.**, Chauhan, P., Sawan, N. and Smarandache, F. (2008): Ratio estimators in simple random sampling using information on auxiliary attribute. Presented in International Symposium on Optimisation and Statistics (I.S.O.S) at A.M.U., Aligarh, India, during 29-31 Dec 2008.

5. **Singh, R.**, Kumar, M. and Singh, A. K. (2011): A family of estimators of population variance using information on auxiliary attribute. New Trends in Life Testing, Bayesian Inference, Sampling Theory, Bio-statistics, Bio-informatics and Computer Applications” held at BHU, during January 5-8, 2011.
6. **Singh, R.**, Chauhan, P. and Sawan, N. (2011): A general family of dual to ratio-cum-product estimator in sample surveys. National seminar on new dimensions in statistics: concepts and issues (NDSCI -2012) Dept. of Statistics, BHU(2-4) March.
